To read the chart below, you will need to be somewhat familiar with our Toho product codes. Here is a breakdown of the parts. The first two letters always start with TO which equals Toho. The second two letters are the shape, which could be R for round, BG for bugle, or many more. The number(s) after the first for letters is the size, 8 for 8/0, 6 for 6/0, etcetera. The last set of numbers and possibly letters is the color code. This is what you'll want to focus on and what the chart below uses. The color codes are consistent throughout the shapes and sizes. So, TO3T221 is the same color as TO11R221.
