Attention, we inform you that the following tutorial has been translated by the automatic translator Google Traduction. We are not responsible for the errors caused and we apologize in advance for the inconvenience. Feel free to contact our customer service via [this online form](#) if you need help to understand this tutorial. [Sabine Aliénor](#) shows you in this video how to cook Prometheus White Bronze dough which is baked in 2 phases. It uses [Prometheus white clay clay](#) , [activated coconut charcoal](#) and [Prometheus Pro 1 kiln](#) . You will find all our [metal pastes](#) that can make metal elements such as silver, copper and bronze. If you do not know the Prométhéus oven, we suggest you read the technical sheet [how to use a Prométhéus oven?](#) The cooking of the white bronze paste Prométhéus is carried out in two phases:
Phase 1: burning of the organic binder at 500 ° C for 15 min.
Phase 2: approximation of the particles, at 770 ° C for 2 hours.
