Comment faire de la pyrogravure sur bois?

What is pyrography?
Pyrography is the art of engraving drawings, shapes, words etc. in a wooden support. It is an ancient technique that is always fashionable and used in creative hobbies.
The artist or pyrographer, by using a heated tip or heated iron, creates a mark on the wood. When in contact with wood, a dark coloration appears following the burning of the wood.
What is the material? (wood or pyrography?)
- The wood: you can use any type of wood, but it is recommended to use a soft wood like pine, poplar or birch. The wood should be dry and clean.
- The pyrography tool: you can use a traditional pyrography tool or a modern one like a laser pen or a laser engraver.
- The design: you can use any design, but it is recommended to use a simple one like a heart, a star or a flower.
How to do pyrography?
- Preparation: you need to prepare the wood and the tool. The wood should be dry and clean. The tool should be heated and ready to use.
- Engraving: you need to engrave the design on the wood. You can use a traditional pyrography tool or a modern one like a laser pen or a laser engraver.
- Finishing: you need to finish the work. You can use a varnish or a lacquer to protect the work.

How to prepare the support?
The wood should be dry and clean. You need to sand the surface. Then, clean it thoroughly.
How to use the pyrography tool?
You need to use the pyrography tool with a steady hand. You need to move the tool slowly and carefully.

How to finish the work?
You need to finish the work. You can use a varnish or a lacquer to protect the work. You can also use a sealant to protect the work.
