Would you like to try your hand at Miyuki bead weaving? Have you already consulted our data sheet on [basic bead weaving concepts](#)? If you want to try Brick Stitch or Peyote weaving, all you need is weaving thread and a weaving needle. For good Miyuki bead materials, you'll need around 5 euros. You'll then need to add the primers, i.e. the metal parts of your jewelry (e.g. clasps, weaving tips, ear hooks). Take a look at our two videos on how to get started with peyote and brick stitch for inspiration on your first beading project.

Now all you have to do is choose your seed bead colors. But here's the thing: Miyuki Delica 11/0 beads (the most commonly used size) come in over 1000 colors and effects! It's hard to choose! What's more, depending on the effect and color, prices can vary by as much as a factor of two. These costs are directly linked to the cost of producing these colors, as some are more complicated or more expensive to manufacture than others.

When you're trying out a new creative activity, it's perfectly normal not to want to buy a hundred euros' worth of material without knowing whether you'll really enjoy it. Hence your question: where can I buy cheap Miyuki Delica beads? Look no further, you've come to the right place! We've decided to create this article which offers you a shorter list of 20 basic colors from our catalog to buy cheap Miyuki Delicas 11/0. They all come in at less than 3 euros per 8 grams, i.e. less than 38 centimes per gram. How to choose your Miyuki beads? To give you an idea, you'll need between 5 and 8 grams of beads to make a bracelet (1 gr represents around 175 beads). Then divide this weight by the number of colors you're going to use. This calculation is just to give you an idea of what 1 bag of 8 grams of beads represents. You'll find all these beads at the bottom of the page.

To create a jewel with a pattern, you only need two different colors. To go even further, the lists below, which have been drawn up in a more or less subjective way by the author of this article, show you the essential references (4 references), basic (10 references), diversified (15 references) and finally the complete formula which corresponds to the 20 references of inexpensive Miyuki beads. No matter how many colors your seed beads come in, you're bound to find a pattern you can adapt to your own colors among our [jewelry and accessory tutorials](#).
