THE 10 ESSENTIALS TO MAKE YOUR HOME HYGGE

By : Perles & Co

Les 10 indispensables pour rendre votre maison

hygge

★☆☆

0 minutes

You like the concept but you don't know how to make your house hygge? To help you, we propose 10 essentials to realize easily.

1- Create a cozy corner
It's simple, you just have to create a cozy space with several cushions, a blanket or a plaid and it will be your perfect space to rest, dream, read a book, drink a tea, draw.

2- Light your fireplace...
A fireplace will immediately bring a warm atmosphere in your home.

3- ... or candles !
If you don't have a fireplace, no worries! Candles are also perfect to create a nice atmosphere in a room. Find our tutorial to make your own candles.

4- Decorate your interior with wooden objects
Wood is a natural, simple and timeless element. For a "hygge" interior, creating decorative objects with raw wood elements is a must have. We have a lot of decorating tutorials right in the Scandinavian trend.
But if you love wood and the pure spirit of the Scandinavian style, why not wear pretty wooden jewelry! Find below a selection of wooden jewelry creation in a very hygge spirit.

• Wooden bracelet Scandinavian style geometric patterns
• Long black and gold wooden beads necklace
• Wooden geometric earrings Scandinavian inspiration
• Necklace faceted wooden beads and tassels
• Scandinavian style wooden beads long necklace
• Wooden beads necklace pastel and gold
• Elastic bracelet wooden beads and pompoms and sequin star
• Necklace with wooden beads and spinning tops PureCrystal Pacific Opal

5- Nature inside
One word ... Let nature into your home! Go for pretty indoor plants (succulents, green plants), offer yourself or have someone offer you bouquets of flowers ... We offer you three DIY ideas to enhance your plants. And if you don't have a green thumb, you can also create paper flowers, so no maintenance problems!

• DIY brass tube plant hanging
• DIY aluminum wire terrarium holder
• Bohemian gold and copper wreath with eucalyptus branch

6- Books, books and more books
Taking a break with a book is completely hygge!
And for the budding creative types, what better way to discover new techniques and get inspired than to browse through books.

7- Ceramic objects
In a very Scandinavian spirit, in parallel with wooden objects, ceramic objects are very popular in Hygge. You can also think about creating ceramic jewelry.

8- Soft textures
Touch is important in this Danish art of living. Surrounding yourself with soft materials is also very hygge. We think of soft materials such as velvet, fake fur, wool... so many materials that can be used in 100% DIY creations for decorative objects (cushion, plaid, blanket, etc.).

9- Vintage has its place
Hunting, renovating old family furniture, up-cycling, these are all activities that fit into the hygge concept.
So grab your brushes and paints and start renovating the family furniture you left in your garage or attic. With a little elbow grease, you'll get a custom piece of furniture.

10- Stock up on blankets and pillows
Comfort and softness are inherent in hygge. One simple and easy thing to do is to position blankets and pillows in your home. What's better than curling up in a blanket on a cool summer evening or winter day?
Make your pillows, sew your blankets with soft and warm materials such as fleece, faux fur, flannel or boiled wool.

We hope that the hygge trend has convinced you and that you will achieve a pretty and intimate atmosphere in your home, but also build pretty memories with your loved ones. Let us know about your experiences by sharing photos of your creations on our Facebook page or by tagging us on Instagram #perlesandco.
På gensyn - vi ses (see you soon in Danish!)
