

## HOW TO INTEGRATE ELEMENTS IN GEMSTONE ?

By : Lucie T Perles&Co

*How to drill natural stone?*

Come

# Tutorial's steps

## ★ Step 1/5

With a permanent marker, note the center of the gemstone vote.

---

## ★ Step 2/5

Put on the diamond drill, start with speed 1 of the Dremel, hold your stone firmly in the water. And drill the Labradorite. The video was shortened, but this part is much longer.  
Be careful with your fingers.

---

## ★ Step 3/5

Check the length of the stem and then cut it with a pair of wire cutters. If it is too long, drill your stone again. The cabochon holder must be perfectly plated to your gemstone.

---

## ★ Step 4/5

Use the paste to visualize your creation and position your elements on the stone. Make a mark with a marker and pre-drill. Then glue the different elements on the stone

---

## ★ Step 5/5

To finish, simply attach your open ring to your pendant and chain. Add the lobster clasp and your necklace is complete.
