

# HOW MANY MIYUKI DELICA BEADS FOR A CIRCULAR PEYOTE RING?

By : Perles & Co

## How to calculate the size of the ring?

To make a ring with the circular peyote technique, I advise you to make a size above your usual size so that the ring will be easier to put on, especially when the fingers swell.

Taille bague française	Enfilade de perles Miyuki Delicas 11/0
48	39
50	41
52	42
54	44
56	46
58	47
60	49
62	51
64	52
66	54
68	56
70	57

To weave a ring with an odd number of beads, proceed as follows.

Step 1: Create a string with the necessary number of beads.

Step 2: Create the ring by ironing in 2 beads. Start in classic peyote

Step 3: To finish this row, thread a bead onto your needle, skip the first bead that comes up and work your way up through the next 3 beads. Start your new row.

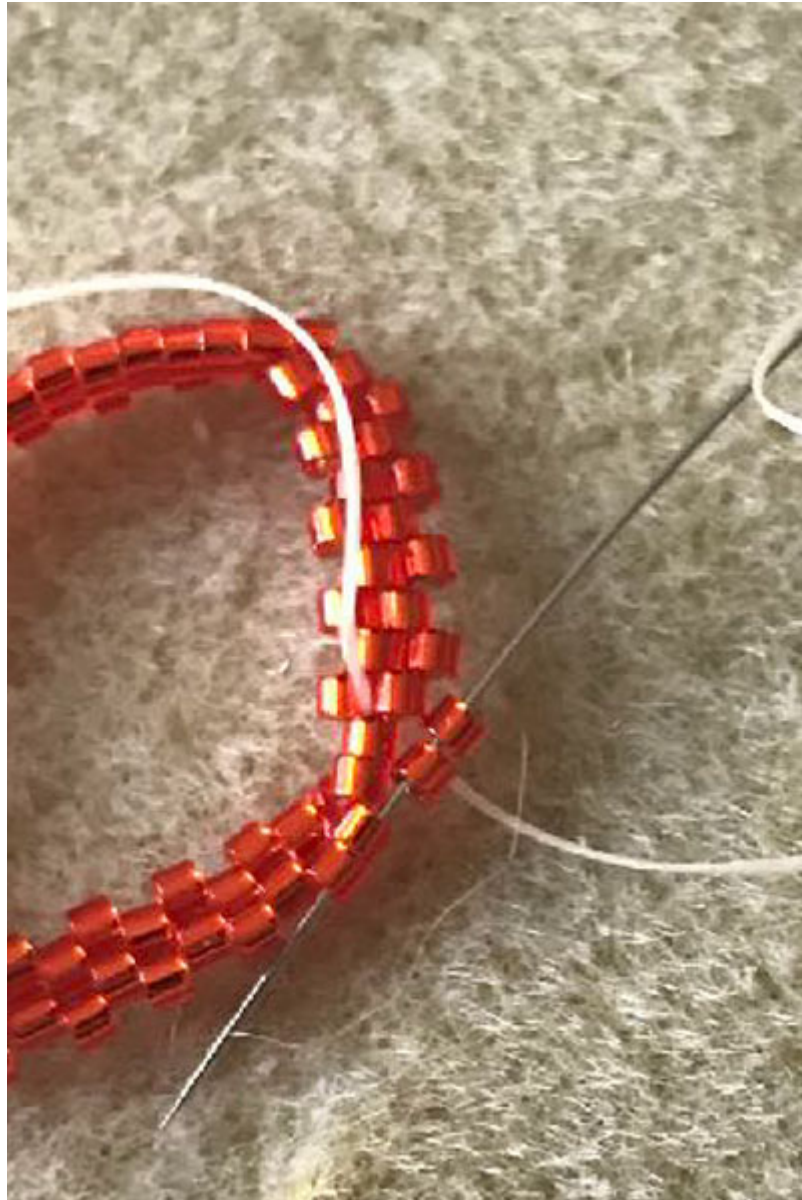

Step 4: To complete this row, thread 2 beads onto your needle, skip the next two beads that come up and work your way up through the next two. Repeat these steps until you get the width you want. This will create a slight offset for you but done on the back of the ring it will not show.

Your bangle bracelet or circular peyote weave ring is ready to go, you can continue your creation.
