What are Heishi beads?

For those of you who don't know yet (and there can't be many of them), heishi beads are round, flat disc-like beads from the Southwestern United States. Heishi beads are some of the oldest jewelry in the world. Heishi round beads come in many materials such as mother of pearl, shell, natural stones, resin, metal, glass, plastic, ceramic, wood... If you want to wear a Heishi bracelet every day, choose polymer clay beads. They are resistant and do not get damaged by the sea, the acidity of the skin or the chlorine in the pool. To be sure to choose the right material for your DIY project, don't hesitate to consult our technical sheet.
