How to make a bead-weaving sloth?

How to make a lazy bead weave?

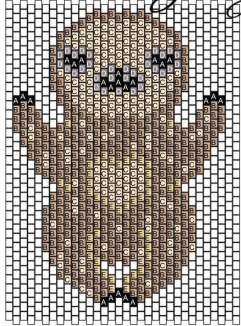

@jennaya has designed a small animal certainly unusual but too cute: lazy chocolate notes. We ask if more and more on social networks, the sloth is the animal that will complete your collection. Suspended upside down, he is known for being super slow and having a super zen lifestyle.

While waiting to be able to live at their own pace, you can create your lazy pearl weave and adapt it as you wish with heart-shaped eyes and a small smile, like kawaii, what do you think? Otherwise, quickly discover all our [patterns](#) to weave the pattern of your choice.

Jennifer gives you a little advice to help you better in the weaving of your lazy: you have a black pearl that connects the two legs of your design, when you weave the second leg lazy, just take out your wire the last black pearl (the one that is next to a golden pearl), put a black pearl and pass the thread in the last black pearl (always next to a golden pearl) of the other leg. Then put your thread in several beads to secure your weaving. Thanks to Jennifer for sharing.
