

## KAWAI PATAGOM ERASERS

By : Karine Barrera

Easy

0 minutes

Create your eras with this new Patagom modeling clay. This product will surprise you and have fun, nothing is easier than to shape small subjects, animals, plants with this paste soft to the touch. You can use to make your molding of all molds thermo-formed and all the silicone molds, so the choice is wide to help you. The colors can be mixed to create new shades, you can also superimpose created elements of another color because by pressing a little different pastes stick together.

Step 1  
Take some pasta tips of colors that you want to work on. When you remove a piece of dough from its block the material crumbles, just squeeze its little pieces between them to soften the dough immediately, crush the dough well under your fingers.

2nd step  
fashion balls of colors

Step 3  
Fill your mold with your dough balls well, some shape like seashell are easy to fill others like starfish require the use of a blade like Fimo cutters for scalping what protrudes from the mold.

Step 4  
Flip your mold to free your marine animals.

Step 5  
Create small eyes to give a kawaii style to your gums using white paste and black paste. You have to make tiny white balls, then crush them under your forefinger then add on it an even smaller ball in black, end by pressing on it to fix it. On your creation. You can now bake your items so they turn into a traditional oven at 120 degrees for 15 minutes.
