How to create earrings with natural seeds?

How to create mini creoles with natural seeds?

Here is an idea of mounting earrings that will follow you all summer. Creole earrings are always trendy, we love to customize by adding beads or charms, you can decline this model with the size of creoles that will suit you, we offer a wide range with this product. It's easy to put some seeds in the creole thread to give a bohemian style to your curls. The Huaeruro red and black seeds come from Peru, they are natural seeds already pierced, the legend says that they bring happiness maybe because they make us think of little ladybugs with their black spots.

Mounting

- You must take a pliers to change the shape of the gold wire of the mini-Creole so that the pearls can be inserted. Place the tips of your pliers where the wire is at an angle, press to break the angle. Pass 5 seeds in the thread of the Creole, Work again with the pliers to replace the wire as it was at its origin.

This little Creole is good to the ear, the fact that its curved rod must pass through the ear hole is neither embarrassing nor offensive.

Have fun to decline this creative idea with other seeds, we have seeds of tagua (vegetable ivory) which are 5 mm that will go just as well for this kind of creation. They exist in all colors.

Which material to use for Mini creoles with natural red and black seeds?
