How to make flowers in easy Fimo clay?

How to make flowers in easy Fimo paste?

Our beautiful partner Audrey de BoudChou Bijoux Création shares today its video secret to make polymer clay flowers more real than life!

Spoiler Alert, another canon tutorial is coming but we say no more for the moment ... We can not wait to show you all that.

In this tutorial Audrey used Premo paste, Fimo paste and made earrings with these pretty red flowers, but you can stick them on a pendant for a choker or a maxi bohemian necklace.

Small Edit, in the video it uses a vein, you can quite realize the irregularities with the tools present in the basket, this tool is totally optional.

This can be a base to make a tulip Fimo paste (or any other polymer clay) but also cherry blossoms Fimo paste (or other paste), the ideal is to take as a model a real flower or a photo for have all the details of colors and nuances to have a realization as close as possible to reality!

You can also find our tutorials in polymer clay to create creations in bloom:

- Hoops with white flower in polymer clay
- Ring and earrings myosotis polymer clay
- Cane foliage polymer clay to make pendants or earrings super cannons!

Find the video at the beginning of the tutorial and do not forget: get ready!

Feel free to share the result on social networks via our Facebook page or on Instagram with #perlesandco
