How to make a simple Miyuki beaded anklet?

It's going to be a hot summer! Let's get out our sandals, flip-flops and tropeziennes galore and adorn our feet with anklets to face the scorching heat in style! Original anklets aren't to be found on every street corner, so the Perles and Co team has decided to offer you a selection of diy anklet or anklet bracelet tutorials. Here's a quick and easy tutorial to get you started. You won't need much material to make this diy jewel. Macramé thread, beads, sequins and gold rings and you're ready to go! Of course, you can also make it with [silver jewelry rings](#) and [Miyuki](#) in a different color. However, use Miyuki with Duracoat varnish to make the color last longer. The anklet closes with a macramé sliding knot. It's very easy to make, but you'll need a lighter or [thread burner](#) to finish it off. Burning nylon thread will hold better than glue.

Which material to use for Miyuki beads beaded bracelet with mother-of-pearl shells?
