We propose in this tutorial to make an ankle jewel with several rows of pearls, chain and coarse shells. This is the jewel accessory of the summer, when our little feet are finally rid of socks and closed shoes. There are all kinds of ways whether they are thin or multi-row as we propose here, often with an air of beach shells are invited in the creation.

Step 1
Cut about 80 cm of leather thread in 1 mm, take your coarse and then pass the 2 ends of your thread in the shell by going over, leave a length of thread that gives a loop that exceeds.

Step 2
Push back the end of the wire on the right side to pass in the loop formed in the previous step. Pull and hold the formed knot end on the side of the coarse and not behind.

Step 3
Thread a bead turquoise ring and then repetition a coarse to fit it as the first. Continue until you get the length you need to do your ankle.

Step 4
Cut the leather thread on each side leaving a little less than 1 cm to put our tips. Pass a lace clamp in one end of the wire and then with a clamp close the mouthpiece and tighten well, do the same on the other side.

Step 5
Cut a second length of leather thread and pass on this one round turquoise beads with all 5 pearls a golden faceted pearl. Make a knot at the end and crush now lace.

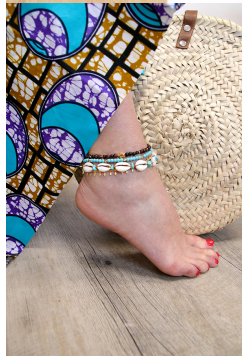

Step 6
Take gold wire to build a third row with gold eye beads, golden pearl beads and a scale like turtle shaped pearl that you'll put in the middle of the length. Close the ends by passing on the end of the wire a head to crush and an 8 mm double ring from the end of the wire above the ring and then go back into the head to crush and in the last beads. Shout with your pliers then crush the head. You have to do the same thing on the other end.

Step 7
Push a ring in each hole of the lace clasp for the turquoise bead thread and then on the coarse row. Cut your golden chain the same length as the wire with the shells, pass a ring on each end.

Step 8
Close all the threads by passing them through the big rings of the tiger eye bead thread. Add on one side your carabineer clasp.
