Where to find a scheme for free bead weaving?

On Pearls & Co obviously! We propose you not a new grid but 4! To make these pretty dolls with their little beret.

We thank our partner Coeur Citron for the nice tut, do not hesitate to visit his website to discover his world.

You will be able to realize a weaving of pearls needle in tutorial using the [Brick Stitch technique](#), you can consult all our datasheets to [begin the weaving of pearls](#).

Take a look at all our [Miyuki bead weaving grids](#), you're spoiled for choice!

These dolls woven brickstitch do not involve any particular difficulty for beginners.

To begin your weaving, start with the center line of each drawing (the line with the mouth).

Coeur Citron has selected several colors that it has used for a long time for its different characters: 4 colors of hair, two colors of lipstick, and 5 references to create a "good-looking" effect on your characters.

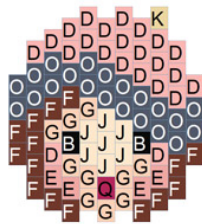

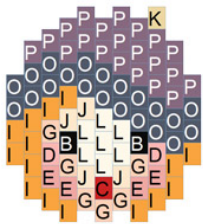

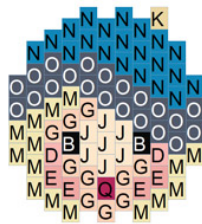

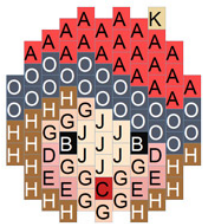

For more references, you can find the Lemon Heart item on [faces and hair colors in pearl weaving](#).

Tip : If you want to mount these characters in dangling earrings: Ideally, you should place your ear hook in the middle of your weave so that it hangs balanced.

Unfortunately, on these characters, the central line is set back, that is to say that the pearl which finishes the rank is lower than the pearls of the ranks which surround it: you will not be able to pass a ring in this pearl to fix your hook.

Here is one of the solutions that I found: [paste a pellet](#) on the back of your weave, making sure the ring is centered. Once your pastille is well glued, you just have to put on your ear hook!

And now it's over, it's up to you!
