5 minutes

How to make earrings with large links?

How to make earrings easily?

How to make a pair of trendy earrings?

The Autumn / Winter trend is at XXL and 70's .

We have big earrings and synthetic materials such as acetate or resin.

We propose you here to make a pair of top trend earrings in less than 10 min.

Large acetate links are back on the front of the stage, we think to use them for the making of bags handles but we can divert their function and this is what makes the joy of DIY .

We have chosen for this pair of dangling earrings a link of red color, but it exists in other colors so do not hesitate!

The same goes for the gold ring and the ear hook, if you prefer the silver is also possible.

These earrings will go perfectly round faces.

For the making of these earrings you will need only a flat or round forceps to open the ring of your ear hook.

You are ready ?

• Step 1

You will receive your links by 30 hooked to each other.

To separate them simply place the opening of each ring face to face and shoot.

• 2nd step

Now you have to hang your link to your golden link.

The golden link has no opening but you just need to pass the open link delicately on the thinnest part of your golden link.

• Step 3

Open the open ring located behind your ear hook using your pliers and insert your golden link through the thin part.

Close your ring by flattening it a bit.

And now, voila !

Here you are in possession of a pair of earrings totally fashionable and in addition you have links to do other.

Which material to use for Earrings big red and gold links?
