How to make a multistrand bracelet with interchangeable clasp?

Today we offer a tutorial from [Lilitha](#). We tell you everything about the creation of a multistrand bracelet inspired by [Faded Pearls](#). The colors of this bracelet are perfect to accompany all your fall looks!

Tip: To calculate the size of your bracelet, simply take your wrist size. You will recover 10 mm of size thanks to the clasp.

The stages:

Step 1: Start weaving your bracelet in the middle and progress side by side using the peyote weaving technique. The diagram is designed for a 10 cm wrist. If the size of your wrist is smaller, you just need to remove a few rows on each side (in order to keep the symmetrical appearance). Conversely, add additional lines with golden pearls. Finish your bracelet with a row of golden beads mounted on a ladder (2" diagram). Slide the last row of golden pearls into the silver tip and close it.

Step 2: Cut the correct length of chain (equal to the first link) in Scissors. Insert the first ball at each end into the end caps. Repeat the operation 4 times. Close the end cap using flat pliers.

Step 3: Cut the ball chain as before. Cut the same length of faux leather. Flatten the ends (you can lightly burn the ends for ease of movement).

Thread a golden mylar bead on a nylon thread. Slide it to the middle of the wire and stop the wire inside to block it. Press the two ends of the thread through the eye of the needle (you will double the thread of your work). Insert the pearls one by one by inserting Czech golden pearls, tiger's eye, golden dividers and black cubes according to the model in the photo or your own inspiration. Finish with a new golden Mylar pearl and block it with a double knot. Insert the three different links into the end piece. For the pearl link, insert the Mylar pearl in the end piece to hide it inside. Close the end cap.

Step 4: Iron your fabric. Cut 1 piece 20 x 4 cm wide. Fold your fabric right sides together and stitch 1 cm from the edge. Open the seams with an iron.

Turn the fabric tube upside down using a safety pin attached to the end that you slide inside the tube. Align the fold of the seams on the side and iron it flat. Cut the tube obtained to the length of your wrist + 0.5 cm. Fold over the ends to make a small 0.5 cm hem and secure with a few stitches. Spread the tube slightly apart and insert the hem inside the tube. Before proceeding in the same way on the other side, insert the loop on the fabric. You can fix it in the middle with some invisible points.

Step 5: Insert the end caps into the golden clasp in the order that suits you.

Your multistrand bracelet is now finished! You are ready for fall!
