How to make pendant earrings mother of pearl?  
How to make party earrings in minutes?  
How to make earrings with the wire wrapping technique?  
The holidays are fast approaching ... and you have to start thinking about party dresses .

Good luck, today we offer you to make in just a few minutes a nice pair of dangling earrings in mother of pearl and gilded copper wire with the technique of wire wrapping.

Do you know the wire wrapping ? It is a trendy technique that consists of wrapping wire around a support to create beautiful shapes.

The white mother of pearl with iridescent reflections is the ideal color for the holidays ... go anywhere whatever your outfit! The mother of pearl coupled with original gold ear studs , it is THE perfect combo.

Beginners? Go for it! Very simple to make, you can create this pair of trendy earrings in no time! You just need to bring your pliers (sharp, round end) and the material indicated at the bottom of the page.

Feel free to refer to our fact sheets to learn the basics of jewelry fitting . You will find information to form a loop on a nail .

The steps :

Step 1 : Cut twice a small length of golden copper wire (about 50 cm). Insert some of the copper wire at the lower end of your mother-of-pearl puck (without coming out from the top end).

Insert a rock bead on the nail and then insert your ball head studs through the same lower end to block the copper wire.

Step 2 : Wrap your copper wire around your mother-of-pearl until you reach the top end of your pearl. You can insert the remaining end inside the hole.

Step 3 : Using a round nose plier, form a loop at the end of your round head nail to attach it to the nail ring.

That's it, your pair of earrings is already finished! Easy, right?

Do not hesitate to show us how you mix these dangling earrings with your party look by posting a photo on our social networks: [our Facebook page](#) and [our Instagram page](#)
