How to make a personalized decorative and useful gift?

How to make a decorative and useful personalized gift?

Christmas is coming and you still haven't found any Christmas gifts to put under the tree? Don't want to run into crowded stores? Here are 3 gift ideas to make yourself in no time on video! And if you are a regular designer, you may have some of the necessary equipment already at home, otherwise know that our orders are prepared and sent very quickly. Consider chronopost or UPS delivery!

Here is the list of 3 personalized gifts that you can make in 1 hour maximum by following our video:

- Decorative brass frame representing the zodiac sign of the person and their wishes for the new year. [Printable template for the New Year greeting poster](#).
- A faux leather basket with potpourri or small homemade treats. Remember to put a paper or tissue paper between the cookies and the basket to protect them. [Simple basket pattern in snake faux leather](#).
- A mini jewelry holder for ear studs to hang on the wall or to hang on another jewelry holder. No need to put them in a separate box!

Feel free to personalize these creative projects using the person's favorite colors. For example, the imitation leather used is available in [many snake and crocodile imitation leather colors](#), but you can also use [thick glitter fabric](#)! The [terry cloth](#) used for the jewelry holder is also available in other colors. You can replace it with [Aida canvas](#) but avoid classic fabrics very tightly woven because the earrings will make holes in it.

Another idea for the display of ear studs or ear studs is to use a canvas in an [embroidery drum](#). You can decorate it by embroidering an expression all around for example, or the initials of the person to whom you are going to offer it.

Which material to use for 3 quick decor DIY gift ideas?

SUPPLIES
