

DIY COLOR YOUR FINISHES AND SEQUINS WITH UV RESIN

By : Karine Barrera

Easy

0 minutes

Do you know how to color your sequins and your jewelry findings? Add a touch of originality to your creations by covering smooth and flat metal parts with colored UV resin. You will also see how to fill the partitioned parts of pendants or openwork spacers.

Step 1

Make your mixture of UV resin and dye for resin on a piece of parchment paper.

2nd step

Place the pendant on a silicone mat to prevent the resin from sticking to the support. Take a toothpick or a needle to take a little colored resin, drop a drop in each gap of the pendant. Do not move the pendant, choose instead to place the UV LED lamp on the jewelry, press the switch once to catalyze the resin.

Stage 3

Turn the pendant over and activate your lamp again.

Step 4

To have the resin slightly in relief you must start again to deposit drops of resin until visually it seems bulged. Catalyze under the lamp again.

Step 5

Take 6 sequins to make a pair of earrings and two ear studs with a disc. Place a few drops of colored resin on these primers and then catalyze the whole.

Step 6

Proceed to assembly by adding two rings on an earring to attach the two parts.

Which material to use for DIY color your finishes and sequins with UV resin?

SUPPLIES

Jumpings open 5X0.7 mm - European-made - fine silver plating x50
Ref. : ACC-398
Quantity : 1

Flat pad earstuds 6 mm fine silver plating x2
Ref. : BO-736
Quantity : 1

Laser cut spacers rosette shape 15 mm - Rhodium Tone x5
Ref. : INTER-823
Quantity : 2

Metal drop charm 7 x 4 mm Silver Tone x 4
Ref. : META-489
Quantity : 2

Padico liquid dye to colour resin - Red x10ml
Ref. : OTL-037
Quantity : 1

UV-LED Resin Hard Padico - Star Drop x30g
Ref. : OTL-348
Quantity : 1

Work mat for Polymer clay 23x33 cm x1
Ref. : OUT-361
Quantity : 1

Mini UV LED lamp for DIY creation with UV LED resin x1
Ref. : TECH-118
Quantity : 1
