How to make a Rainbow wall decoration with rope?

How to make a macramé rainbow?

It is a decoration very easy to carry out. Anyone can make their rainbow out of rope. It can even be an idea of manual activity for children who will keep them busy on a Wednesday afternoon. You will just need big core, embroidery threads to decorate your rainbow of colors, scissors, a ruler and a sewing needle. This technique can also be used for other shapes, for example a spiral, or you can also create your basket with coiled rope and embroidery thread on some pieces of the rope to decorate the basket.

Do you like this DIY decor tutorial? Here are two other tutorials that you might like, the first one is made with the same rope. You can therefore make two different tutorials with the same spool of rope.

• [DIY Chou chou rope knot](#)

• [Hemp wire dish](#)

Step 1 :  
Cut several pieces of rope. Start by cutting two strings of 19 cm, 21 cm, 23 cm, and 25 cm.

2nd step :  
Take the first color of thread and tie it 4 cm from the end of the 19 cm rope.

Step 3 :  
Put the end of the wire against the cord on the side that will be hidden by the wire and wrap the bordering wire around the cord without the cord visible below. Continue until you reach 4 cm from the other end of the rope. Tie the thread and put a little glue on the knot.

Step 4 :  
Do this for all colors and check each time that the thread stops where it should be on the string by pre-placing the strings in a rainbow and in the correct order. You will cut the fringes later.

Step 5 :  
Cut about 60 cm of sewing thread and thread it on a needle. Tie the two ends together to double your thread. Place the strings against each other and sew with the needle through the four strings.

Step 6 :  
Stitch diagonally, crossing the four cords each time. Please note you must pre-position your rainbow. Then cut the fringes. Do the same with the second rainbow.
