

## DIY UV RESIN LED PENDANTS AND PRINTS

By : Karine Barrera

Easy

0 minutes

Make your own pendants, prints, dividers in UV Led resin, we explain how to create in this tutorial a pair of original earrings in a very short time. [Here](#) you will find links to dyes that can be mixed with UV resin to color your creations.

**Step 1**

Make in small containers a mixture of UV Led resin, a little ultra fine glitter and a Padico dye. It is important to know that if you carry out this mixture under a great light you will have only a very short time approximately 2 or 3 minutes before this mixture starts to harden (catalyze) under the effect of UV without even the lamp. It is therefore necessary to be quick and above all to provide next to you a very opaque box in which you can protect your resin mixture from light so that you can reuse it for the second earring.

**2nd step**

Fill in the silicone plate the mold you like, take a needle or something thin to distribute the resin evenly. There may be some bubbles, in this case approach a flame 2 cm from the bubble so that it rises and disappears. Try to remove the excess resin on the reliefs. Once you have used the UV resin, remember to protect it from light immediately. Catalyze the resin in the mold by putting it under a lamp, press the switch once.

**Stage 3**

Turn the plate over with the molds and then catalyze under a lamp again otherwise the underside will remain sticky.

**Step 4**

Use disc ear studs, press the rod into a paste, for example here it is raw polymer clay. Place a drop of the mixture made for the earrings on the trays, then place your moon sequins on the resin. There should not be a lot of resin or the sequin will sink into the liquid. Catalyze these primers once under the lamp.

**Step 5**

Pass 5 mm rings at the bottom of the prints then another ring at the top which will be used to connect the ear studs to the resin pendants. Place shuttle sequins on the bottom rings.

## Which material to use for DIY UV resin Led pendants and prints?

### SUPPLIES

5X0.7mm Open Jump Rings - European-made -fine Gold plated x50  
Ref. : ACC-396  
Quantity : 1

Flat pad earstuds 8mm Gold tone x2  
Ref. : BO-743  
Quantity : 1

Oval charms smooth finish 9mm fine Gold plated x10  
Ref. : BR-990  
Quantity : 1

5x4mm Gold filled glue-on element - Half-moon Shape x1  
Ref. : GLD-538  
Quantity : 2

Padico liquid dye to colour resin - Black x10ml  
Ref. : OTL-042  
Quantity : 1

UV-LED Resin Hard Padico - Star Drop x30g  
Ref. : OTL-348  
Quantity : 1

Bottle of Glitter Extra Fine - Shiny Gold x20ml  
Ref. : OTL-453  
Quantity : 1

Mini UV LED lamp for DIY creation with UV LED resin x1  
Ref. : TECH-118  
Quantity : 1

144x99x4mm Silicone mold for resin - Spacers and pendants x1  
Ref. : TECH-679  
Quantity : 1
