How to make earrings with stones?

How to make earrings with stones?

Create your personalized earrings with gemstones easily by following this minute DIY tutorial. This DIY is very fast, easy and requires little material. An ideal opportunity to get started in the creation of costume jewelry. Perles and co offers you a whole selection of 8x6 mm oval cabochons in fine stone or mother-of-pearl to make these golden earrings. You can create fancy earrings of all styles and all colors. Not in the mood for natural stones? You can also choose to put a little polymer clay in the setting or colored resin by keeping the tray well horizontal on a support. The faceted Sodalite used in this step by step costume jewelry is a stone from the family of silicates. It looks a lot visually like Lapis Lazuli but is more veined with white and brown. Its benefits in lithotherapy are also similar to Lapis Lazuli. It is a stone of thought and rationality. It reduces fears and brings confidence and creativity.

You can also wear it as an elastic bracelet using 3 to 6 mm Sodalite beads.

Pleated sequins and earrings are also available in silver, so we have put the two versions in the list of materials below.

Step 1 :

Put a touch of jewelry glue in the tray of the sleeper earring. Do not put too much or it may overflow when you place the cabochon. Glue the cabochons and wait for the glue to dry.

2nd step :

Open a ring by rotating the two ends and not by moving them aside, place the pleated sequin in the ring then the ring of the earring and close the ring by making small round trips to place the two ends of the ring against each other.

Step 3 :

Do the same with the second earring.

Do not hesitate to show your creations on our Facebook page, in the Super club group of Perles & Co customers or on Instagram by quoting us with @perlesandco or with #perlesandco.

Which material to use for Pleated sequin Sodalite cabochon earrings?
