*How to make a UV LED resin pendant?*

How to make a UV LED resin pendant?

UV LED resin is a magic resin that catalyzes in 1 minute thanks to a UV LED lamp. This will allow you to make resin jewelry in minutes. You can for example make pendants with rings and include small gold filled elements or dried flower petals. You can also make your own resin beads and personalize them with inks or glitter.

Gold filled is a technique that covers a 12 to 14 carat gold with a brass primer. It is a much thicker and more resistant layer of gold than gold plated, but with slightly less good quality gold compared to gold plated which is at least 16 carats on our site.

Follow this minute video tutorial to create your own multi-row necklace with resin pendant. Want to test other resin jewelry tutorial? Discover our category of special resin tutorials !

Warning ! Always use the resin in a ventilated area, with safety glasses, gloves and a mask.

Step 1 :

Put UV LED resin in the ring pendant by applying it well on the edges with a toothpick. Place the element to be glued in the shape of a star or sun in the center. Remove bubbles by approaching a lighter or gas lighter near the resin. Place the UV LED lamp over the pendant and light it for 1 minute. Put a little resin on top for a Brillant effect, spread it with the toothpick and reapply the lamp.

2nd step :

Turn the pendant over, put a new layer of resin on the back, pass the lighter over it if necessary and apply the lamp on it.

Step 3:

Cut 38 cm of Cobra chain and 42 cm of convict mesh chain. In the center of the cable link, place the pendant with a small open ring in gold filled. At each end of the chain add a ring and on one of them the spring clasp.

Step 4:

Thread 15 PureCrystal pearls 3 mm on the Cobra chain. Sometimes you will need to force or remove the small bits that block the hole with a hand drill.

Step 5:

Apply the mini lace clips to the end of the Cobra chain and flatten them. Check that they are well fixed. Add the chain on the rings already attached to the cable mesh chain. Add a few rings on the end of the end without clasp if necessary.
