2h

How to make a macramé plant stand yourself? How to make a macramé plant stand?

How to make a macrame plant suspension pot??
 Follow the very simple video tutorial to make your own macrame pendant for a flowerpot. It is a very easy and affordable DIY. As you need to know is a single knot. The macrame knot or flat knot and its twisted declaration, the spiral of flat half knots. Also find our video on the [11 basic macrame knots to create your own suspension model](#). It's much easier than it sounds!
 Natural white doesn't appear to you? We have a [large selection of dyes and colorants in 3 mgs](#). You can create supports for hanging macrame plants in dozens of different colors.
 First prepare your equipment by gathering 8 pieces of 2 in rope with a thickness of 2 mm, 2 pieces of 80 cm, a wooden ring, a pair of scissors, and off you go!

Step 1: From top 8 cords in the ring that you will have fixed to height. Cut a new piece of 80 cm, form a loop that you will place against the ropes that you passed in the wooden ring to make a yellow knot. Wrap the longest end around the ropes and the loop, extending beyond the end of the loop. Once you get near the end of the loop, pass the wire in it and then pull the end of the top rope until the bottom wire and the loop are in the middle of the coiled strings.
 Step 2: Make 21 flat half knots using 4 strings to create a spiral. Do you have trouble understanding how to make this knot? Don't panic, we made a separate video for you to show you the 11 basic macrame knots. The link is in the introduction. The flat knot is at 12:30 a.m. and the flat half knot is at 1:04 a.m.
 Step 3: Repeat step 2, 3 more times. You get 4 spirals.
 Step 4: After each set of ropes, make a flat knot 12 cm from the end of the spiral.
 Step 5: Then use 2 ropes from 2 sides side by side. So you end up with 4 strings, the two ends of which are longer than the two in the center. Make a flat knot 18 cm from the last knot this time. Do this 2 more times to tie the knots on the suspension.
 Step 6: Then make 12 flat knots 12 cm from the last knot.
 Step 7: Finish hanging with a new yellow knot and cut the excess wire.

Do not hesitate to show your creations on our Facebook page, in the Super club group of Perles & Co customers or on Instagram by tagging us with @perlesandco or with #perlesandco.

Which material to use for DIY Macrame rope pendant for plants or flower pots?
