0 minutes

To create this beautiful ring, you will need some basic tools such as: Pour réaliser cette jolie bague, vous aurez besoin de quelques outils de base :

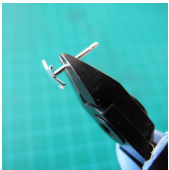

IMPORTANT: Always wear gloves when handling the Ceralux paste! (Read safety information) Step 1: On a clean, flat work surface, cut a small piece of each component (A and B) of the Ceralux paste (they must have the same weight). Mix them together until you have a homogeneous paste.

Step 2: Put the paste ball on your ring to form a rounded cabochon. Smooth the paste with your gloved fingers.

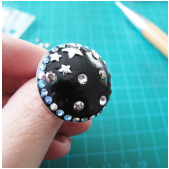

Step 3: Cut the ring attachment of the star stamp using cutting pliers, and its rod, leaving about 2 mm length. Do the same with the 2 small stars earrings.

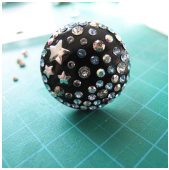

Step 4: Press the stars in the Ceralux paste, then using the previous place some 2mm PrasiCrystal cabochons. You have to push the whole point of the cabochon.

Step 5: Continue with 2.2 mm cabochons by the outside circumference of your ring, alternating colors.

Step 6: Continue by performing as before, fill small spaces with round 2mm crystal roller cabochons.

Let the paste Ceralux harden about 12 hours, your jewelry is done!

Which material to use for Constellation Ring with paste Ceralun and PureCrystal round stone?

SUPPLIES

Earstuds Silver- tone x2
Ref. : BO-107
Quantity : 1
