Do you like polymer clay? Thanks to this tutorial you will be able to easily create a 3D adornment in [polymer paste](#).

For the beginners, we invite you to read our technical sheets "[tips and tricks for creations in polymer clay](#)".

STEP 1 :

Cut two slices of duck effect 3d, on each slice remove only one side a few centimeters so as not to have the edge patterns that are automatically a bit crushed. Put side by side the two slices make sure that the joint is placed in order not to lose the effect 3 D. Here a slice has been turned so as to put the diamonds of the same colors face to face.

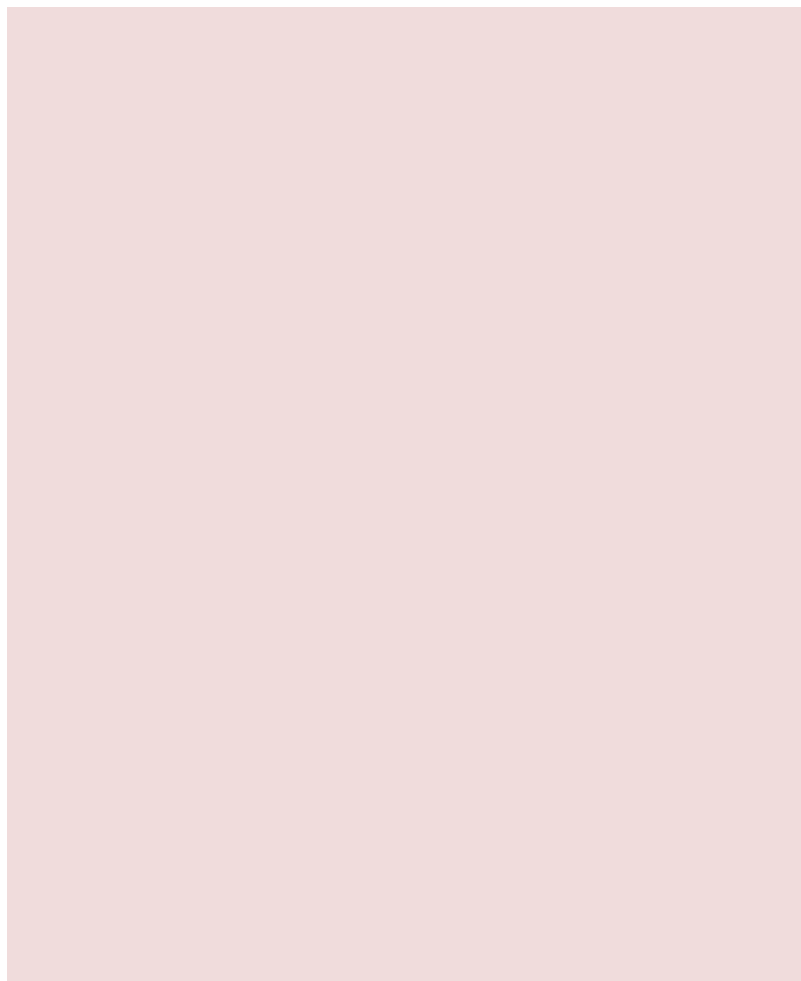

Place your slices on the black pastry pasted in the broadest pasta machine. Place cooking paper on the drawings and with a small roller to erase the fitting.

STEP 2 :

Cut straight with a hard blade the top edge of your rectangle and then the sides. Cut the bottom into a round with the flexible blade. Surround your drawing with a strip of black paste of the same height.

STEP 3 :

Repeat the operation with the cooking paper to clear the strip and drawing connections.

Cut again with the blades leaving only a few millimeters. Start cooking at 110 degrees for 30 min.

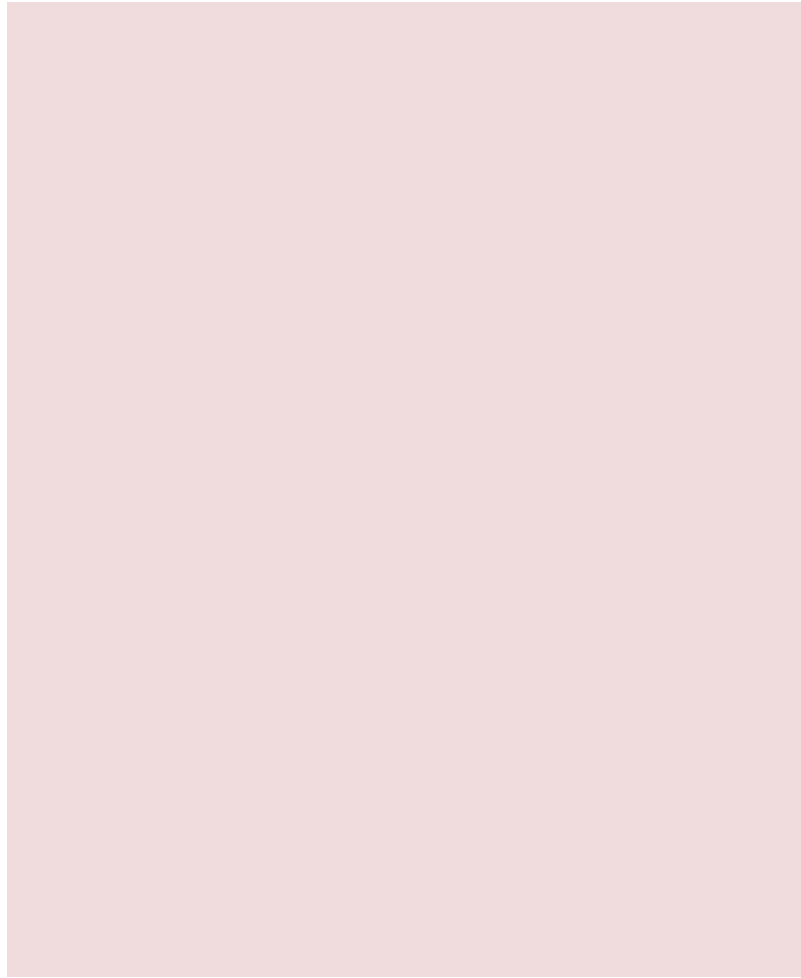

STEP 4 :

Cut 2 slices of 3D canes. Pick up a 3 cm round with the cookie cutter each. Take with the same tool 1 crescent moon on top of your rounds.

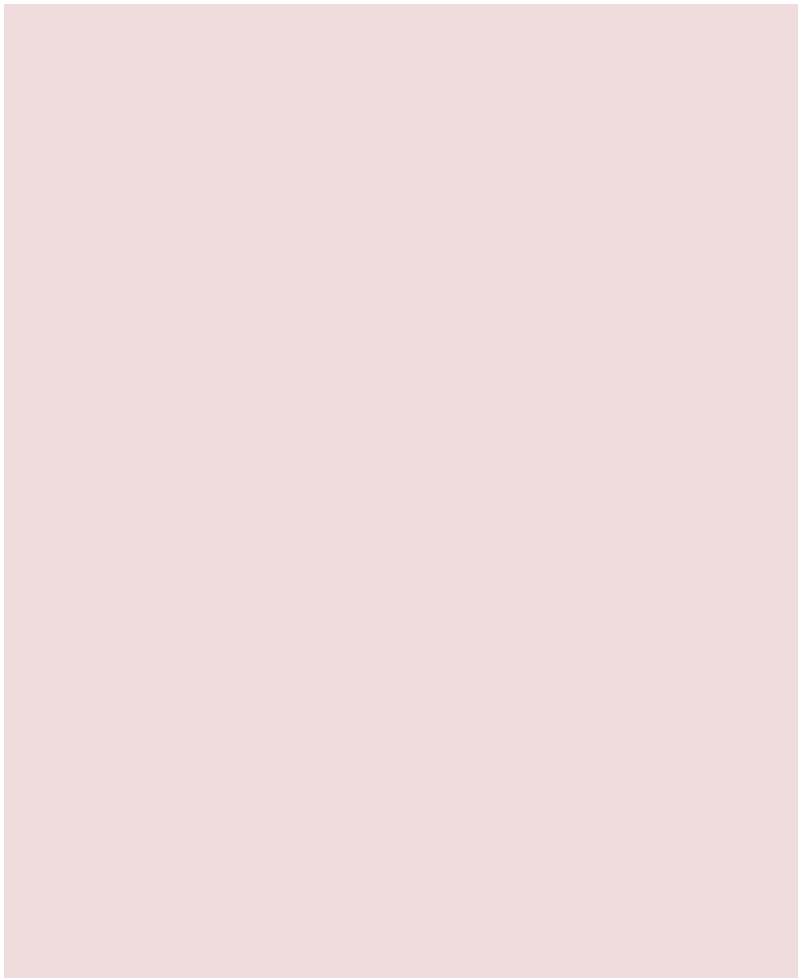

STEP 5 :

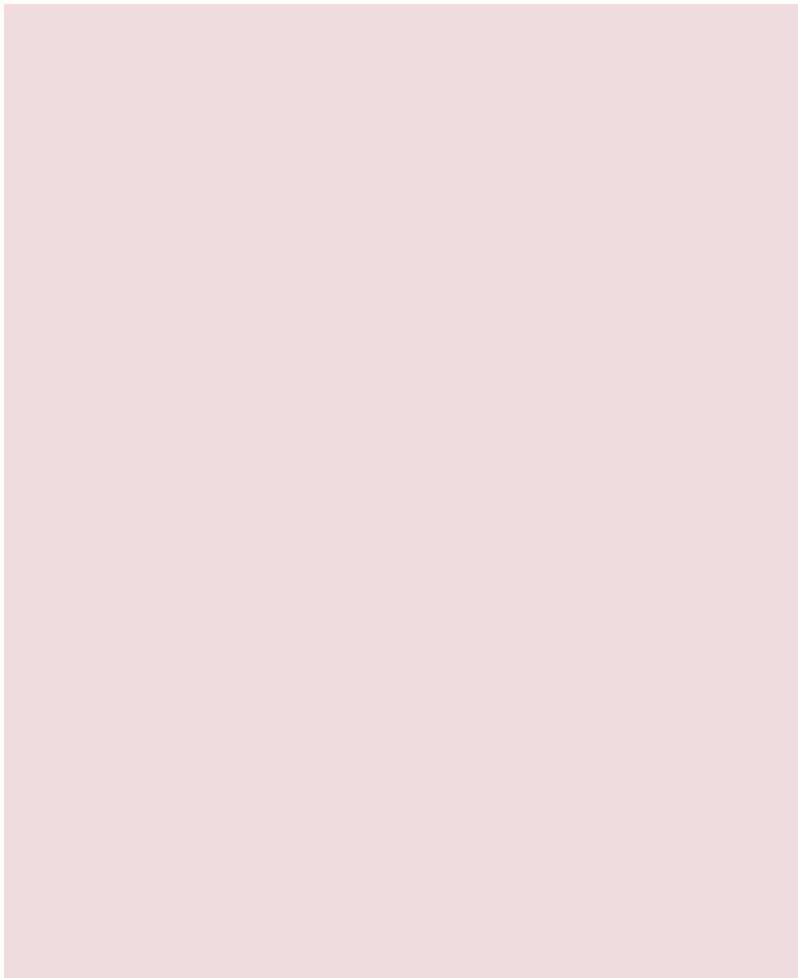

Make a plate with black paste, it must be of the same thickness as the rounds. Place the black circles in the hollow of the lenses, erase the fitting with baking paper and a roll or card. Remove a crescent of black moon again leaving a black band a few millimeters. Cook your pieces 30 min at 110 degrees.
