What are the trendy necklaces for this summer?

It's soon the summer! And the new trends that come with it. The accumulation of necklaces is always on trend for our greatest happiness! We really like to mix different minimalist necklaces to make them THE essential piece of clothing! Bohemian, chic, elegant: a mix of styles we love! ?

In addition, you have the chance to mix them endlessly, wear the number you want and create them with your colors and the style you prefer! Multistrand stacking collars give way to your imagination!

At Perles & Co, we find that gold is perfect with pearly colors! And then these are two colors that go with any of your outfits. It's the winning combo !! In addition, the tutorial is simple to perform, it is suitable for both beginners and more experienced!

Do you have the equipment in place? Let's go !

Necklaces with chains:

For the two longer chains, you just have to cut the chain length you want (here 50 cm for the shorter and 60 cm for the longer) using a pair of pliers. Add open rings to each end. Thus, you can place a spring clasp and a small extension chain which will allow you to adjust the length of the necklace according to the superposition of the other necklaces.

Place the collars on a flat surface, so you will easily find the middle of it. Add an open ring and place the charm of your choice. For the shortest necklace, we added a coin-like charm. For the longest necklace, we have given the same charm as well as a charm with a pearly pearl, the two charms are placed on the same ring.

Miyuki pearl necklace:

Bring a wired wire to thread beads. The length will depend on you, the length you want for your necklaces.

For the first necklace, which will be the shortest (here 45 cm), you must first insert a crimp bead into the wire and add the clasp. Iron the wire in the pearl and crush it. Are you a beginner? Find out [how to use a crimp bead](#). Thereafter, come insert the pearls by inverting golden and white until the end. Once finished, pass a crimp bead and insert an extension chain. Insert the wire into the crimp bead and mash it to secure the necklace. When the wire exceeds insert it into the pearls, if you do not succeed, cut.

For the second necklace, take a wire just a little longer (here 50 cm). Perform the same technique as for the first one, but this time with only golden pearls. Once in the middle, insert a drop-shaped gemstone that will personalize the necklace!

Necklace with pearly pearls:

Take the wired wire and cut the wire 55 cm long.

At first, insert 5 pearly pearls and on each side add a golden engraved tube. Put back 5 pearlescent pearls and again an engraved tube, invert each time.

Secure the necklace with crimp beads, use the same method as for the previous two necklaces. Remember to add the clasp and the extension chain.

And now, your 5 necklaces are finally finished! ? Assemble them as you wish, wear them alone or with others, mix as you wish! We told you that these necklaces are simple to make !

Do not hesitate to reproduce the tutorial and share your original creations with us on [Facebook](#) or [Instagram](#) , we will meet there!

Which material to use for Multi row necklace with big chains, medals and pearly pearls?
