To carry out this tutorial you must first follow the step-by-step of the technical sheet to [learn how to create a white marble effect in polymer clay](#).

Step 1 :

Cut one or more slices from the marble imitation block and put them on a thin sheet of [white polymer clay](#).
Pass the [roller](#) to expel the air or pass your plate to the widest notch of the [dough machine](#).

2nd step :

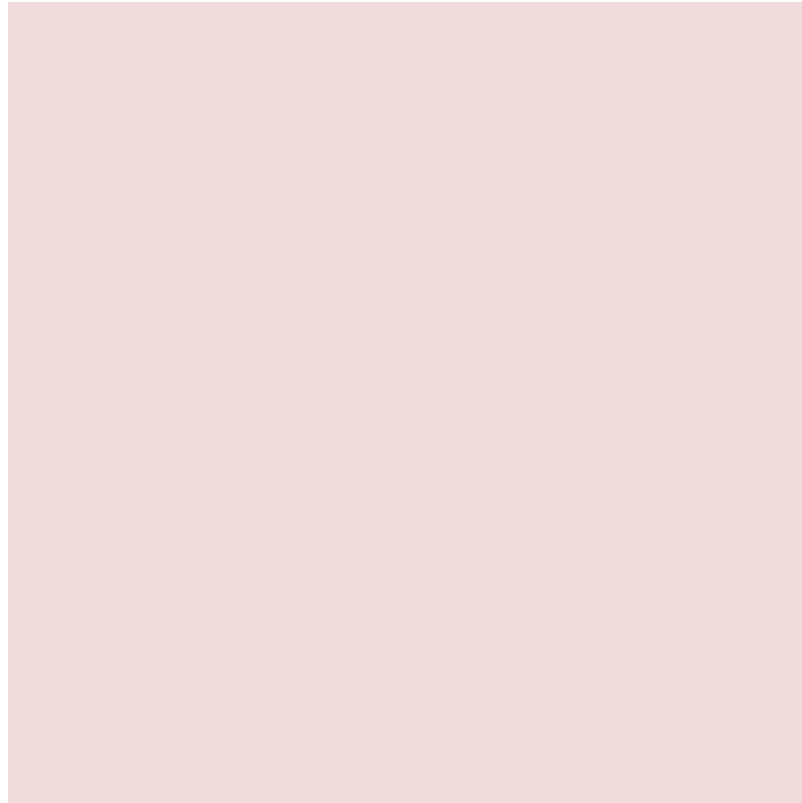

Cut using a blade 2 rectangles 1.5cm wide by 3.5cm long.

Cook at 110 degrees for 30 min.

Hole your rectangles with your [hand mandrel at the](#) top and bottom.

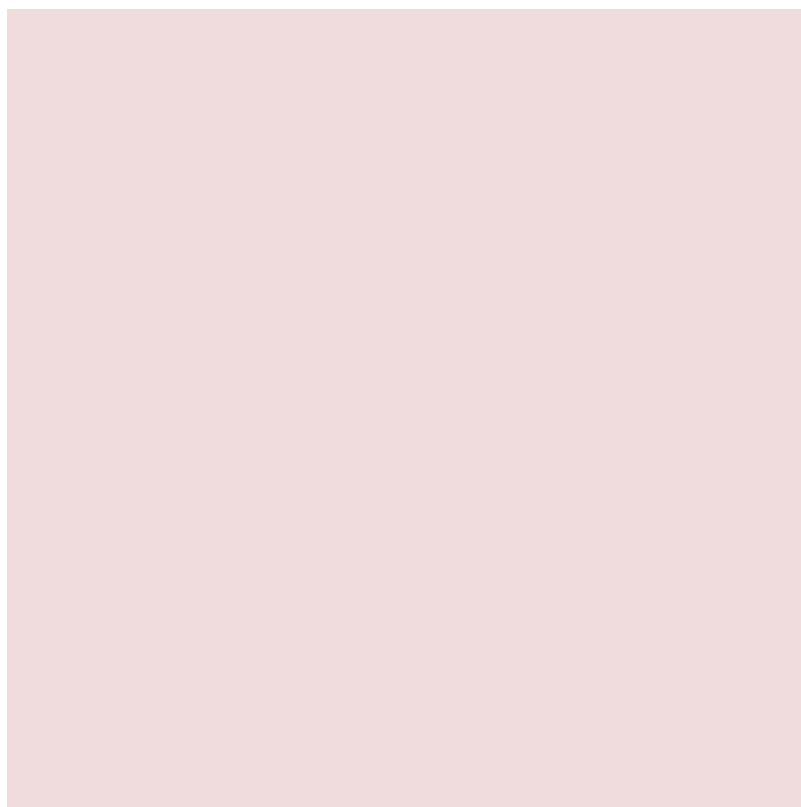

Sand your rectangles with 1000 grain abrasive under soapy water and then polish with micro-meshes.

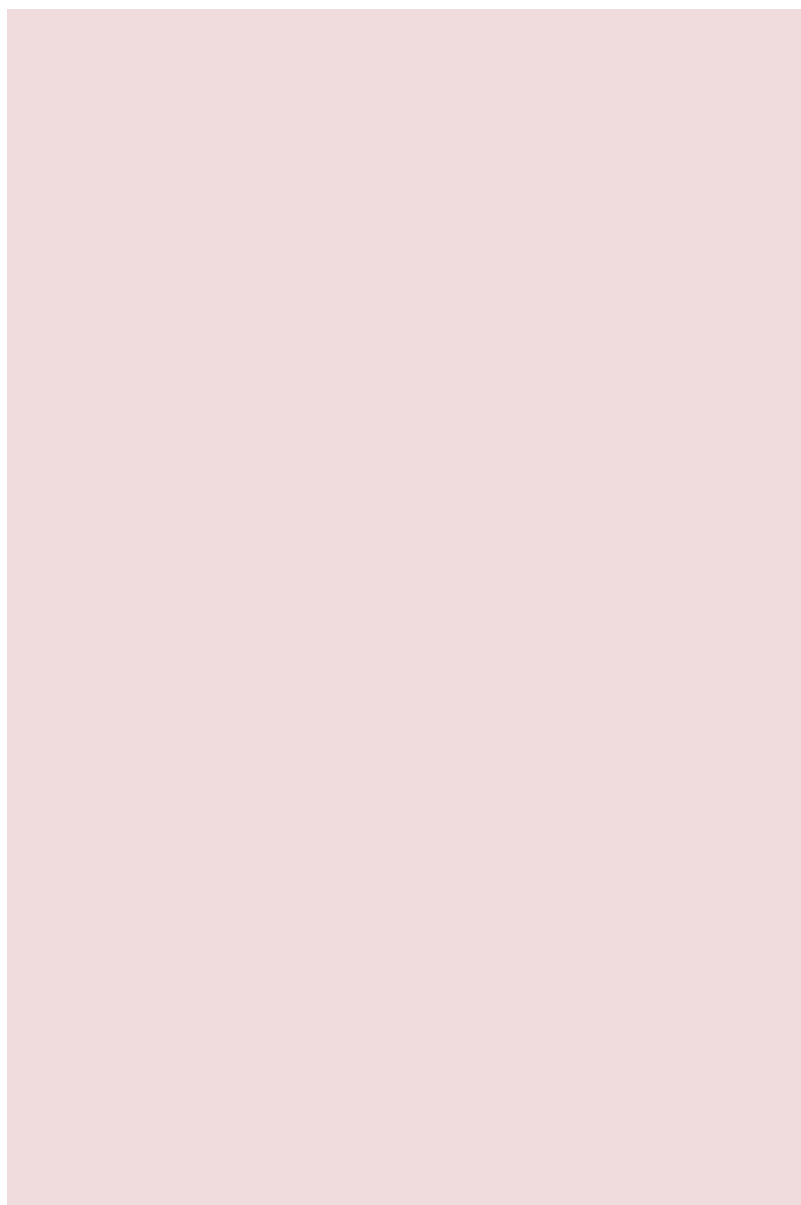

Step 3:
Pass a large ring through each pompom, connect it to the rectangle. (To help you: [How to open an open ring?](#))
Thread the black pearl on the round head nail and reform a loop on the other side. (To help you: [How to form a loop on a nail?](#) You can also use a [special pliers to form a loop](#))
Attach only one side of a small ring and hang it on the larger one which must now be passed through the hole on the top of the rectangle.
Connect the support of the earring to the rod with the pearl.
