AMETHYST EARRINGS

By : Karine Barrera

★☆☆

Easy

🕐🕐🕐

30 minutes

Make a pair of earrings with amethyst gemstone chips that wrap around a rectangular primer. These trendy jewels are very simple to make and give a chic and pure look. If you have never used metal wire to attach beads to a support it's time to get started, there are many interesting jewels to create with this technique.
You can decline this tutorial with other colors of gem pearl chips, the ear studs on which we glued the cabochons also exist in ear hook version with the same diameter of cabochon to be glued.

Which material to use for Amethyst Earrings?
SUPPLIES

Amethyst 5 - 8 mm Chip beads x78cm
Ref. : CHIPS-063
Quantity : 1

Copper wire 0.30mm Light Gold tone x 70m
Ref. : FC-659
Quantity : 1

Jewel Glue Strass 244 20 ml
Ref. : OUTIL-128

Ref. : SL-576
Quantity : 1

Small round 4 mm cabochons - Amethyst x5
Ref. : SP-814
Quantity : 1

steps

⭐ Step 1/4

Cut 30 cm of metal wire, roll it on the side at the top of the rectangle, tightening it well so that it looks nice and even. Make the second earring as well, but wrap the wire on the opposite side to the first earring so that it looks like a mirror effect.

⭐ Step 2/4

Pass a first chip through the wire, go around the primer and then turn it tightly around the base of the wire under the bead. Add another turn on the rectangle and then pass another stone in the wire.

⭐ Step 3/4

Continue to thread your Amethyst stones until there are 5 on each side.

⭐ Step 4/4

Make several turns of wire after the last chips before
cutting flush to the back of the rectangle.
Put some strong glue in the hollows of the ear studs and
then put your stone cabochons. Pass a ring in the ear nail
then another in the hole of the rectangle, connect the two
rings, your amethyst earrings are finished.
Do not hesitate to show us your inspired creations.
