Easy

8h

How to make a macramé mural decoration with fringes?

Here is a video tutorial accessible to beginners that will allow you to create your own macramé mural. It is composed of several basic macramé knots that you will learn and put into practice as you go through the tutorial step by step. More precisely, there are 3 nodes covered in this video:

- The lark's node
- The flat macramé bow
- The oblique baguette knot

It is the arrangement and combination of these nodes that allows you to create different patterns. Once you master these nodes you can create your own macrame suspension patterns. Of course, other nodes exist. We will show them to you in future creations. Come back regularly and subscribe to our pages on Instagram, YouTube and Facebook to be aware of their release.

We used for this DIY, a square metal stand to change from the classic wooden branch. Do not hesitate to vary the supports in order to create unique macramé decorations. This square metal stand is available in white, gold and in different sizes. We also have circles, triangles and driftwood sticks for macramé.

In this tutorial we have used 2 colors of macramé rope in natural cotton: light grey and white. We have many other colors to offer you to customize your creation. Some of them have been added in the material list at the bottom of the page, and for the others, go to our selection of macramé thread.

You are very interested in macramé and would like to see more tutorials on this subject? Go here to find all of our macramé tutorials for decoration.

Which material to use for Macramé Decorative Tutorial with fringes on square suspension?

SUPPLIES

Suprême Cotton 3XL peigné cord for macrame - Blanc x 75m
Ref. : FCU-779
Quantity : 1

Cotton Supreme 3XL combed cord for macrame - Light Grey x 75m
Ref. : FCU-781
Quantity : 1

30cm Bare metal square for hanging dream catcher and lampshade - White x1
Ref. : TECH-963
Quantity : 1

SUPPLIES

Scissors 25cm x1
Ref. : SEW-336
Quantity : 1

steps

★ Step 1/6

Hang the top of one of the squares on a bracket or on your wall with a nail and wire. Cut 10 1 m wires in white. Fold them and tie them on either side of the square with larkspur knots. This will give you 10 threads on the top two sides of the square. Make a square knot with the 4 threads in the centre.

★ Step 2/6

Then add below the first knot, 2 more square knots using 2 threads from the center and the next 2 on each side. Continue in this way, adding one square knot each time. Once you have finished the line with 5 square knots, repeat the operation but removing one knot from each line to end up with a single knot on the last line. Paint the fringes and cut them again.

★ Step 3/6

Cut 6 grey threads of 1 m, fold them in half and hang 3 of them on each side on the square with lark's knots. Braid them until the braid reaches the centre of the square. Gather the 2 braids together. Take a thread from the first one. Make a loop downwards and then a loop upwards with it. Take a thread from the other braid and wrap all the threads with 2 to 3 times tightly. Then pass the end of the thread through the top loop of the first thread. Pull on the bottom loop to bring the top loop down with the end of the thread.

Step 4/6

Cut 1 grey wire of 1 m and hang it on both sides of the square with the knot shown in the video. Contrary to the video, keep a longer length of wire on the left side because this end of wire has been extended out of camera. A little less than 30 cm. Place on top of it 60 cm grey wire, folded in 2 and hung with lark's knots but in the other direction than shown previously. This aesthetic detail is of no importance but make sure that the direction is the same from one end of the rope to the other. Fill the rope completely with these grey threads. Paint and trim the fringes, trying to be as symmetrical as possible.

Step 5/6

Cut 8 threads of 4 m, fold them in 2 and tie them on each side of the square with lark's knots. Then tie at least 36 threads of 30 cm on each side. The longest strings will be used to make **oblique** chopsticks. With these knots we will make rhombuses. Pay attention to the direction of the knotting, putting the video in slow motion if necessary. The **knots are made on a main rope which gives the direction**. These are the same 2 ropes that go on one side then the other in the pattern. In each diamond you will add a square knot in the center to decorate. Make 7 diamonds on each side.

Step 6/6

Then join the 2 diamond lines together with the same knot, regardless of the side of the knot. Then make a few more slash knots to finish the pattern with a nice point. Collect several grey scraps of rope or cut new ones to make a pompom. Tie a rope in the centre of these threads and knot a knot a little further on this rope. Wrap another rope around the threads folded in half and knot it to hold it in place. Paint the fringes and cut the tassel. Then pass the tassel rope through a hole in the macramé weave and pass the tassel through the loop to hang it up.
