

SUPERDUO ELASTIC BEAD BRACELET WITH HALO BEADS

By : Tiffanie Perles&Co

Easy

1h

Make this slim and customizable bracelet in dozens of different colors in less than 1 hour. You will need 3 different kinds of beads: SuperDuo, Miyuki 11/0 seed beads and flat faceted beads. These beads come in many different colors.

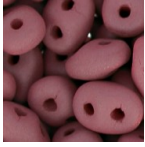

You can also give a little more originality to your bracelet with the Halo Beads which are metal beads that are placed around the SuperDuo. Halo beads are part of the "Cymbal beads". They are a set of metal beads and primers specially designed for certain types of Czech glass beads. These glass beads come in an incredible number of different shapes. You can combine them together and add Cymbal beads primers to create a multitude of combinations.

Elastic bracelets are very easy to make as long as you follow certain steps:

- Pre-stretch your elastic thread before threading the beads. All elastic threads loosen slightly at first. It's better to force them to stretch before you finish your bracelet rather than once the knot is already made.
- Thread the beads as you go along, placing the whole thing on your table rather than holding it in your hand to avoid dropping all the beads.
- Depending on the size and brand of the elastic thread you may or may not be able to finish your bracelet with a knot. The thread used here allows you to finish with a surgeon's knot.
- Avoid storing your elastic thread and your already made bracelets under the sun or in a too hot place. UV rays and solvents damage plastics.

Which material to use for SuperDuo Elastic Bead Bracelet with Halo Beads?

SUPPLIES

SuperDuo 2.5x5mm Saturated Lavender x10g
Ref. : DUO-262
Quantity : 1

Elastic thread 0.5 mm Stretch Magic Griffin Transparent x 25m
Ref. : FCU-726
Quantity : 1

8x5.5mm 2-holes Connector - Halo Beads for SuperDuo - Gold Tone x1
Ref. : ITC-173
Quantity : 4

8x5.5mm 2-holes Connector - Halo Beads for SuperDuo - Antique Silver Tone x1
Ref. : ITC-175
Quantity : 4

Miyuki Seed beads Duracoat 11/0 4201 - Galvanized Silver
Ref. : MR11/4201
Quantity : 1

Miyuki Seed beads Duracoat 11/0 4202 - Galvanized Gold
Ref. : MR11/4202
Quantity : 1

Fire Polished faceted flat round 2x1.5 mm Light Purple Iris x35cm
Ref. : RVC-650
Quantity : 1

SUPPLIES

Jewel Glue Hasulith 30ml
Ref. : OUTIL-007
Quantity : 1

steps

★ Step 1/2

Cut 30 cm of elastic thread and pre-stretch it by pulling on it. The string of beads shown in this step makes it possible to make an elastic bracelet that does not serve the wrist for people who have a wrist of less than 15.5 cm but if you remove a SuperDuo at each string then it will be too small. Once the beads are strung, check the length with a ruler and readjust the strings if necessary. The bracelet should be at least around your wrist + 1.5 cm. If it is larger than this value it is not serious.

Halo Bead+SuperDuo inside: HB

Veneer: F

Rock 11/0: R

SuperDuo: S

Bead sequence to be **repeated 4 times**: 1HB, 1F, 1R, 1S, 1S, 1R, 1S, 1R, 1F, 1R, 1S, 1R, 1F, 1S, 1R, 1F, 1R, 1S, 1R, 1S, 1R, 1F, 1S, 1R, 1F

★ Step 2/2

Cut a new 30 cm piece of wire and pre-stretch it as well. Pass it through the bottom hole of one of the Halo Beads. Thread, 1 F, 1R and pass it through the second hole of the next SuperDuo. Thread 1R, 1F, 1R through the second hole of the next SuperDuo. Continue until you have completed the bracelet.

Make a double surgical knot on each side of the bracelet. Be careful that the bracelet has not turned. Apply a pinch of glue, then once the glue dries cut the wire ends 1 mm from the knots.
