How to make earrings with Fimo clay?

In this video you will find a step by step to create a pair of flat Creole earrings made of polymer clay. The design is a marbled pattern made from a mixture of white, golden and taupe colored Fimo clay. Two firings are necessary for the creation of these earrings in order to have the necessary thickness to be able to stick on the edge of the jewel a 4 mm earring. For this finish, we suggest you use Ceralun, which is a two-component epoxy resin paste. This is an alternative to glue so that you don't have to worry about the primer peeling off.

Which material to use for Flat creoles in Fimo paste?

SUPPLIES

Cernit Number One 56gr Taupe (n°812)
Ref. : CERNIT-107
Quantity : 1

Stainless Steel flat pad earstuds 4 mm x2
Ref. : EAR-052
Quantity : 1

Fimo Soft Polymer Clay 57gr White (n°0)
Ref. : FIMO-000
Quantity : 1

Fimo Effect Polymer Clay 57gr Metallic Gold (n°11)
Ref. : FIMO-011
Quantity : 1

Paste Ceralun 100gr white
Ref. : OUT-103
Quantity : 1

Round cutter set x3
Ref. : OUTIL-076
Quantity : 1

SUPPLIES

Imperia pasta machine Sfogliatrice type
Ref. : OUTIL-525
Quantity : 1

3 blades set - Fimo
Ref. : TECH-153
Quantity : 1

230x280mm Waterproof flex abrasive sheet P1000 x1
Ref. : TECH-720
Quantity : 1

steps

★ Step 1/4

Take white, taupe and golden dough, mix while making a ball, spread with a roller before passing the whole in the dough machine 2 or 3 times by changing the direction of insertion in the rolling mill.

★ Step 2/4

Tear pieces of pasta and place them side by side to form a new baking sheet.

★ Step 3/4

Start cooking at 120 degrees for 30 minutes.
Once the dough has cooled down, work to cover the back of the creoles by applying scraps of pasta on a new reconstituted baking sheet.
Bake the whole thing again with the same time and temperature as the first baking.

★ Step 4/4

Lightly sand your parts, especially the edges, with a 1000 fine grit abrasive. Use ceralun paste to glue and cover your ear nail on the creole, taking one dose of each color of ceralun you need the same amount. Mix your two components and use it as a very strong glue, as it is a resin it will take a day to solidify at least.
