## steps

### ★ Step 1/10

Fix the small and large brass circle with very thin wire as shown in the picture

### ★ Step 2/10

Hang the first flower. To do this, hold the flower with the large circle and fix it with the same wire as before, making several turns to ensure that the flower does not move.

### ★ Step 3/10

For some flowers, you will have to remove leaves or stems so that they fit in the circle.

★ Step 4/10

Once most of the flowers are attached to the circle, to avoid too much wire, you can continue your composition by sliding the thinner flowers between the wires already present.

★ Step 5/10

Once the composition is finished, you can cut the stems that stand out by levelling with a scissor.

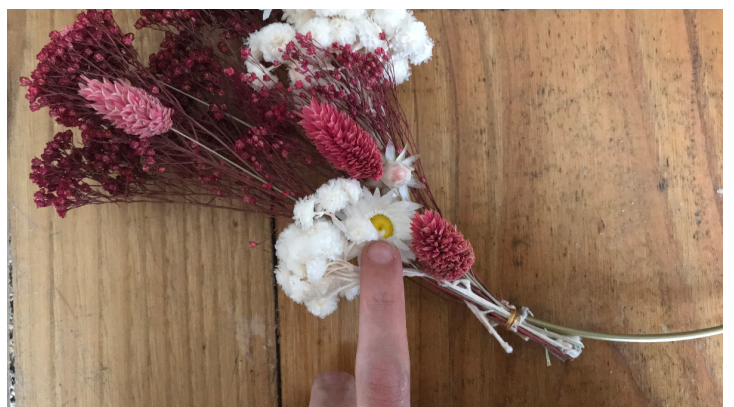

★ Step 6/10

If you have some flowers left, you can glue them with a glue gun.

★ Step 7/10

I came to fill in the gaps to bring a touch of yellow into my composition.

★ Step 8/10

With a piece of leather, create a tongue that will allow you to hang your creation on the wall. Cut it to the desired length.

★ Step 9/10

Punch the piece of leather with an eyelet to get a nice finish.

★ Step 10/10

Your composition is finished! All you have to do is find the perfect place for it!
