## How to weave seasonal fruits and vegetables into Miyuki beads?

You may have already seen them at the edge of the woods and paths, blackberries and mushrooms are out! For this occasion, and to continue the nice series of fridge magnets that Léa aka @3princessesàlamaison has in store for us, she's back today with two treasures of the woods: a blackberry and a mushroom in relief.

Here's a good way to combine business with pleasure: weave a pretty pattern to leave on the fridge to remind us which fruits and vegetables are in season to put in our baskets and our recipes. For those of you who are drooling over this tutorial, don't wait any longer to see the [other fruit and vegetable diagrams](#) from @3princesses at home :

- [DIY Pumpkin magnet embossed weaving brick stitch beads Miyuki](#)
- [DIY Tomato magnet weaving brick stitch beads Miyuki](#)

In this tutorial, you will find diagrams and steps to weave a blackberry and a mushroom and mount them in magnet. The weaving is done with the brick stitch technique, for which you will find our advice by consulting these two technical sheets:

- [How to do Brick Stitch weaving with a needle](#)
- [How to make a brick stitch weaving with increase and decrease?](#)

You can of course find another use for these beautiful weavings: a bookmark, a brooch or a pin, or simply a decorative element to slip under a decorative frame... The choice is yours.

Now it's your turn to be creative! And don't forget to show us your creations on [our Facebook page](#), in the [Perles & Co customers' Super Club](#) group or on [Instagram](#) by tagging us with @perlesandco or with the #perlesandco.
