steps

★ Step 1/14

Mix equal parts of white, peach and vanilla.

★ Step 2/14

Once the mixture is homogeneous, stretch your ball of dough to form a half-circle cane.

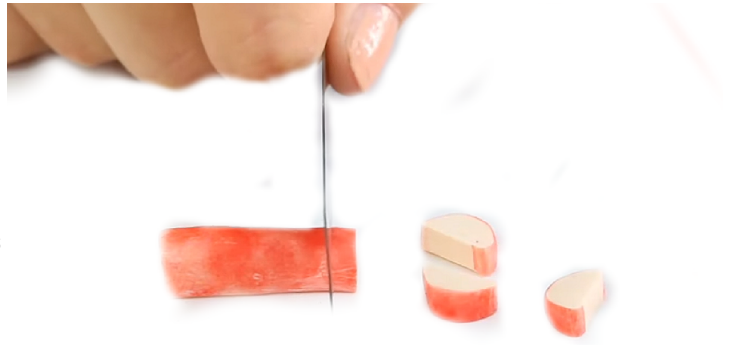

★ Step 3/14

Apply red dry pastel with a brush on top to represent the skin of the peach.

★ Step 4/14

After a few minutes in the refrigerator, cut several slices with a similar thickness. Be careful not to make the slices too thin!

★ Step 5/14

Shape the hollow of the peach with the back of your scalpel.

★ Step 6/14

Texture the peach piece with a toothbrush. Then to preserve the texture on the second side, place your creation on a sanding paper.

★ Step 7/14

With a needle, texture the center by pulling the dough out.

★ Step 8/14

Colour the centre part with a red pastel and a brush.

★ Step 9/14

Put all your peach slices in the oven heated to 110°C for 30 minutes.

★ Step 10/14

Once your creations are fired and varnished, we will move on to the assembly part of the jewel. To begin, form the "pattern" of your bracelet by alternating with pearls and slices of peach.

★ Step 11/14

To create the bead connector, thread your bead through a round-headed nail, then bend the shank and form a loop by cutting off the excess.

★ Step 12/14

Assemble each element by alternating beads and peach pieces.

★ Step 13/14

Continue until you get the size you want for your bracelet.

★ Step 14/14

Hang the carabiner on one side and the extension chain on the other.
