How to make a bracelet with golden round beads?

There are many techniques that allow you to create bracelets with beads: elastic bracelets, stringing beads, weaving beads. There are also ready-made beaded bracelets that make your task easier. Indeed, you can remove the small ball that serves as a clasp and thread beads on it. You just have to make sure that the hole for the beads is big enough to fit on the band. The thread of the ring measures 1.7 mm, so it is better to take beads with a hole of more than 1.8 mm.

This allows you to quickly and easily create a bracelet with your favorite beads and colors. You can use wooden beads, as in this tutorial, large resin beads very fashionable, charms, polymer clay heishi beads and many others! Create your own bracelet by using the list of materials at the bottom of this page, or by browsing through our thousands of references of beads to make jewelry.

This DIY bracelet is made of a multitude of golden beads of different shapes and sizes. This accumulation effect gives it the appearance of a Boho Chic style bead bracelet. The gold or silver bead is a must for all designers and will blend perfectly with other types of materials.

Attention, once the pearls are threaded, this bracelet will only fit a wrist size of less than 17 cm.
