

## METAL BANGLES WITH SILK THREAD AND BRAIDED NYLON THREAD

*How to wind coloured thread onto a bracelet?*

In this DIY tutorial, you'll find all the steps you need to create beautiful rush bracelets with Griffin silk thread and braided nylon thread that will surprise everyone around you.

The tutorial corresponds to the gold and red bracelet. This tutorial is similar for other bracelets, just change the materials.

Notes: The rods used have a diameter of 58 mm, which corresponds to a wrist circumference of less than 15 cm. For a thicker wrist, you can use these beads: gold-toned bead, silver-toned bead.

Please note! The glue used in this tutorial does not permanently bond the thread to the snap ring. It only serves to hold the wire in place, making it easier to grip, and to prevent the wire from unravelling completely if you inadvertently let go. Follow the instructions in the tutorial carefully, and use your fingernail to hold the thread as you start to wind it. It's the way you wind the wire that will hold it in place on the bracelet.

NB: The Rose Gold rush is no longer available.
