

DIY MIRROR IN ROUND WOODEN BEADS AND JUTE CORD

By : Perles & Co

Easy

0 minutes

Looking to decorate your home in a Scandinavian spirit ... we have the tutorial you need!

We offer you an ultra simple DIY decoration in which you will learn how to customize a round mirror thanks to a glue gun and wooden beads

To your pistols, ready? paste!

STEP 1

Cut a circle 34 cm in diameter from a cardboard box, which is 4 cm longer than your mirror.

Then, stick the mirror on the cardboard circle with a hot glue gun.

2ND STEP

Take a thread on which you will spend 70 wooden beads then close by a double knot.

Put glue on the cardboard following the outline of the mirror. Work in small portions of 5cm and position your beads on it. Glue all the pearls.

STEP 3

Proceed in the same way to glue the jute bead next to the beads. Leave an opening of about 15 cm or you will not put glue. Make a knot 20 cm from the mirror to hang it.

Cut a length of cord equivalent to that of the missing part on the top of the mirror, paste it here to simulate a continuity of the first cord.

Your mirror is now finished! What do you think? A round mirror customization simple and fast but effect "wahou" guaranteed!

Feel free to send us photos of your version of the pearl mirror on our [Facebook](#) page or to "hashtag" us on [instagram](#) #perlesandco!

Which material to use for DIY Mirror in round wooden beads and jute cord?

SUPPLIES
