## steps

### ★ Step 1/5

Select different shapes and colours of acrylic links and check that they are compatible

---

### ★ Step 2/5

Also choose a chain with large links that you will be able to detail individually to intertwine with the acrylic links

---

### ★ Step 3/5

Insert the heart ring that serves as a clasp in the slot of the first link (here beige) then continue by associating other acrylic links through the slot provided for this purpose, or by opening the links of the metal chain. Here, tube beads are inserted on the metal links for more originality. Play with the colours and shapes of the links for an asymmetrical effect.

---

### ★ Step 4/5

Close your link bracelet with a clasp. To do this, connect the last link to your lobster clasp. For more originality you can mix several rings together.

---

### ★ Step 5/5

Finally, link a small charm of your choice to a 9mm lobster clasp with an open round ring and jewelry clips. You can hang this small charm on your interlocking rings to add detail to this piece of jewelry.
