1h30

Find in this video tutorial all the steps to create simply a beautiful bracelet with the glass beads AVA® Beads and RounTrio .

But do you know AVA® Beads ? This is a new Czech pressed glass bead, designed by designer Gianna Zimmerman. Its modern geometric shape (chevron) corresponding to the letter "V" leaves many possibilities of assembling and weaving. This bead measures 10x4 mm and has 3 holes: a hole through each tip of the V and a hole at the base. Its shape and the number of holes allow different combinations. It's up to you to play and create your shape and your motive.

If you've fallen in love with this new herringbone bead, you may be interested in another tutorial: Ethnic Earrings with AVA® Beads .

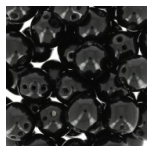

Many thanks to Potomac Bead Company for sharing the tutorial and to the designer Allie Buchman who created this elegant bracelet.

Attention: In the list of material below, we suggest products identical or similar to the references proposed in the video. It's up to you to choose the colors you prefer.
