How to make your own phone jewelry?

In 2020, I made my very first tuto, a Stainless Steel Multi-Rang Bracelet, Miyuki Delicas and PureCrystal Toupees. Many months have passed since the creation of this tuto (15 to be exact) and no I was not on a sabbatical, but I was preparing pretty newsletters for you every week. *(By the way, are you subscribed to our newsletters?)* And then 2022 came and I wanted to try again. So here I am again with a new tuto, all new and beautiful. Despite my great love for silver jewelry, this time I'm offering you a golden jewel! For a few months now, they have found their place in our jewelry boxes, cell phone accessories are ultra-trendy at the moment. To be worn around the wrist or left hanging, they are THE touch to finalize your outfit!

Want to make your own phone jewelry? Go to our tutorial section where you can already find several styles of phone jewelry.

Without further ado, I present to you this cell phone jewel which is part of the "La bohème" collection. This collection with ethnic and bohemian inspirations will make you travel!

For this jewel no need for a strap, the braided nylon thread serves as a support for the beads, but also as a fastener. I used beads in red, blue and purple shades that enhance the golden elements.

Suitable for beginners, you will have a beautiful accessory in just a few minutes! This cell phone jewel has a little originality. I chose to link the two sides with Superduo beads. If you want to use this jewel as a phone clip, you are free not to use these beads.

What about you? Have you adopted a phone jewel? I personally love it! My phone is easier to find at the bottom of my bag!
