How to create earrings ?

We are delighted to present our new March jewelry collection entitled Aux fils du temps! Why Aux fils du temps? Like the many colorful micro macramé threads that we carefully unwind and patiently knot to create pretty DIY costume jewelry.

For this tutorial of micro macramé and gemstone pendant earrings, we mixed materials and colors: delicate gold notes for a touch of sophistication, the freshness of the green of the gemstone and the softness of the pink of the micro macramé wire. We chose green Amazonite stones and our new Linhasita 0.35 mm salmon colored wire, but you can adapt these fancy earrings according to your desires. Feel free to vary the color of the natural stones and the micro macramé wire to make a piece of jewelry that looks like you.

Which material to use for Micro macrame amazonite earrings?

SUPPLIES

5x1mm Open Jump Rings -fine Gold plated plated x50
Ref. : ACC-444
Quantity : 1

Ref. : SSC-322
Quantity : 2

41mm Half round opaque resin spacer - unbleached x1
Ref. : STQ-660
Quantity : 2

steps

★ Step 1/6

Glue the Amazonite cabochons on the ear studs

★ Step 2/6

Cut 20 strands of about 15 cm. Then make a lark's head knot on the resin spacer.

Place 10 strands on one side, insert the twisted rings in the center and then again place the other 10 strands. For the twisted rings, follow the order on the photo: 2 small rings then 4 larger rings in the center and finally 2 small rings.

★ Step 3/6

Insert a seed bead and make two macramé flat knots. Burn the edges

★ Step 4/6

Connect the two tips with an open ring.

★ Step 5/6

Assemble 3 open rings to the small Amazonite charm and connect it to the center ring of the tips. To assemble the ear stud add an open ring

★ Step 6/6

Glue the resin spacers to the ends with hasulith glue and your earrings are finished
