How to make an elastic bracelet with wooden beads ?
Are you new to jewelry making and want to create an elastic bracelet with wooden beads? Follow this tutorial and make your own bracelet in a jiffy. The products used in this tutorial are indicated at the end of the page, you can add them to your basket by clicking on the small icon on the right.
Step 1 :
Cut a piece of silicone elastic thread 0.8 mm from the size of your wrist +15 cm.
2nd step :
Make a simple knot at the end of the thread and thread the 10 mm wooden beads and the 6 mm beads. Check the size of the bracelet on your wrist, and add or remove beads.
Step 3:
Undo the simple knot while being careful not to drop the pearls. Make a capuchin knot with the silicone thread. Learn how to make a Capuchin knot by watching this video . Apply a touch of jewelery glue to the knot. Once the glue dries, run the threads through the beads to hide them.
Step 4:
Pass the open silver rings in the 3 cotton imitation pompoms . You can ease the passage of the rings by widening the hole of the pompoms with a big needle or a toothpick. Place the rings on the bracelet and close them. Do the same with the star sequin.
NB: Attention, the list of products below is not in conformity with the picture of presentation. For reasons of stock, the pearls have been replaced by equivalent pearls (size 6 mm) . You can also choose to replace the pink pompom with another pompom color .

Which material to use for Elastic bracelet wood beads pompoms and sequin star?

SUPPLIES
