How to make a long necklace with wooden beads?

Here is a DIY jewelry to create a wooden pearl necklace in pastel colors ... A creative idea to make in less than 30 minutes!

Light wood and pastel colors are highlighted in this tutorial. Very simple to make, just wooden beads, several colors of paint and thread. We chose to paint some black pearls to bring contrast and bring a touch of chic with gold metallic beads.

This jewelry tutorial can be adapted to infinity: it's up to you to mix the colors and shapes for a jewel to your image and according to your desires of the moment.

For other inspirations, you can also see our other wooden jewelry tutorials.

1. Paint two faceted wooden beads with black paint. Do not hesitate to spend two layers for complete opacity.

2. Paint a round bead with powder pink paint two other half round beads using masking tape. Pass two coats of paint for complete opacity. Be sure to let the paint dry between layers. We chose Chalky Finish paint because it is a chalky paint, water based for an ultra-matte, chalky and velvety appearance!

3. Once the paint dries, all you have to do is put the beads on a thread. Here, we chose Lizbeth cotton thread in pink to bring lightness to this necklace but nothing prevents you from putting a very fine chain (be careful, make sure that the diameter of the chain is less than 2mm).

Your saltire is finished! You can wear it with all your favorite outfits.
