How to make a bead weaving necklace on a loom?

How to make a beaded loom on a loom?

Bracelets are not the only jewels possible with weaving at the loom. You can create necklaces, rings, accessories such as belts or pins. Just choose the right finishes.

In this tutorial we propose to make a jumper a weaving of pearls . And little extra challenge: It is woven without rock and Miyuki Delicas ! The video illustrates the weaving and presents the pearls used in this realization. This necklace was woven with Miyuki Rectangle Beads, Miyuki Slender Bugles and mini hematite cubes . Find more information in this technical sheet for how to choose your pearls for weaving on a loom? Be careful, this is not a video about weaving beads for beginners. If you are new to the game, please refer to this data sheet and this video tutorial to help you.

The video presented on this page is a live facebook of January 2017. You too, join our community on social networks and be informed of all our events!

NB: Attention, the list of products below is not completely in conformity with the picture of presentation. For reasons of stock, the bronze square is no longer available for sale.

Step 1 :

Prepare the loom. Use here C-Lon AA thread, you can also take silamide thread. You can follow this video tutorial to help you: " Make a Miyuki Delicas woven beaded cuff bracelet "

2nd step :

Make the weaving of pearls. Once the desired weaving length is achieved, iron the weft thread into the beads to lock it. Tie a knot to the side. Warning ! Prefer to finish the weaving with something other than mini-hematite cubes because the hole is very small and you can only iron 3 times in with the needle. On one side, finish the weaving as in the video presented in step 1, on the other side, surround the interlayer with the warp threads before stuck them in the weaving in their turn.

Step 3:

Put a dab of glue on the knots to stiffen them. You can put Cléotoo glue on the back of the weave to prevent the rectangle beads from spinning or you can stick the weave on a metal or leather strap. if you make a bracelet.

Step 4:

Mount the weave on the chain with two 5 mm open rings. Put a tip of jewelry glue on the sides of the square at the location of the rings to hold them in place. Glue the opening of the rings at the tab of the spacer to prevent the chain from escaping the rings.
