STEP 1

Cut two pieces of 300 cm of paper string. Pass them through a key ring and tie a knot at the top to obtain four (4) strings of equal length.

2ND STEP

Thread a bead randomly on each of the four strings. Tie a knot under each bead. Divide the cords about the same distance and pass each of them through a hole in the wooden disc.

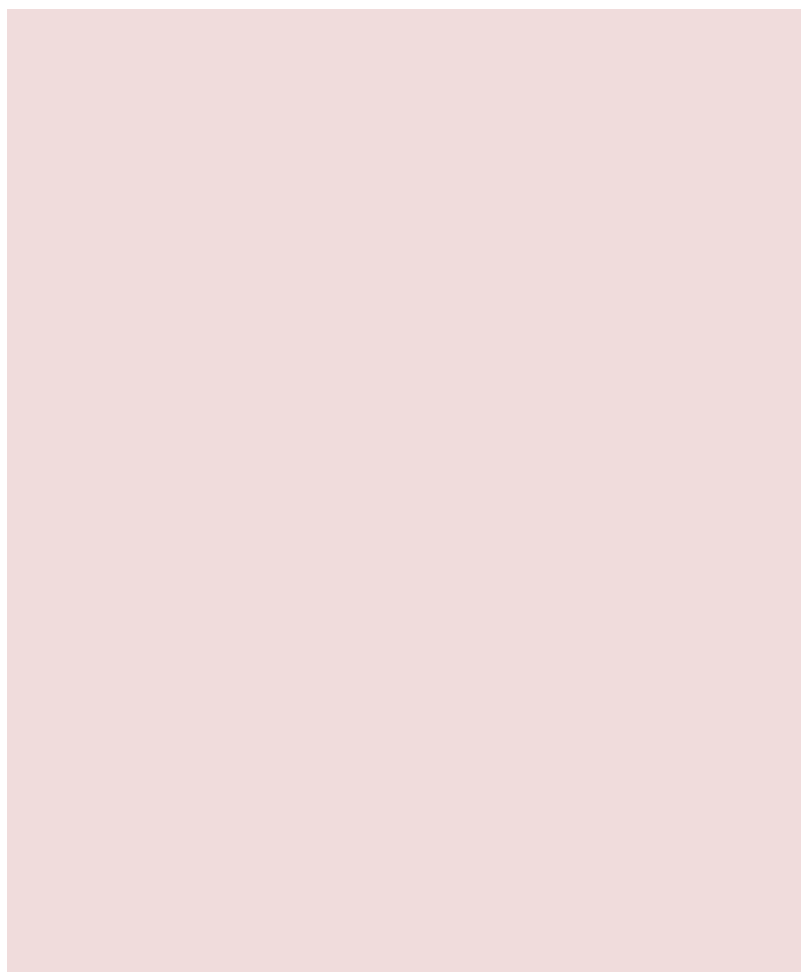

STEP 3

To replace the wooden tray, we suggest you use a round cork plate with a diameter of 20 cm on which you will have previously drilled holes. Then, pass each of the four strings in the wooden bead under the wooden disc, tie a knot and shorten the strings.

Your suspended shelf is finished. All you have to do is find the perfect place in your house. it will be ideal for laying a small pot of flower or your favorite cactus.

Which material to use for DIY deco - hanging shelf with wooden beads?

SUPPLIES
