

POLYMER CLAY HEART

By : Karine Barrera

Easy

0 minutes

Step 1:
Take a bar of Opal polymer clay, knead it and make a ball

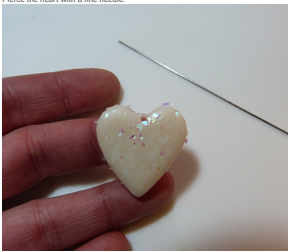

2nd step:
Flatten your ball with a roller or pass it to the thickest notch of your dough machine.

Step 3:
Put the film on the dough then with the cookie cutter, take a heart

Step 4:
Pierce the heart with a fine needle.

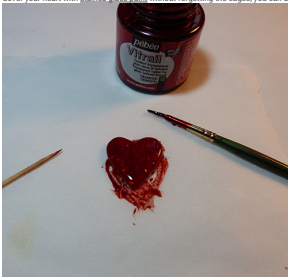

Step 5:
Bake it in the oven at 120 ° C for 30 minutes.

Step 6:
Sand the entire core with 1200 or 1000 grit, then rub with a soft cloth to remove the residue.

Step 7:
Cover your heart with stained glass paint without forgetting the edges, you can use a toothpick to maintain your heart. The complete drying of the paint takes 3 days!

Step 8:
Connect the choker to the heart using a pendant tie.

Which material to use for Polymer clay heart?
