How to make pearl telephone jewelry?

Today, phone jewelry is a must-have fashion accessory. Colorful beaded phone jewelry adds an elegant and unique touch to embellish and personalize your cell phone. These phone pendants have become a fun and creative way to personalize and decorate your smartphone, turning them into real fashion accessories. In preparation for summer, we've decided to add some color to our L'Escapade DIY jewelry collection. Here you'll find some pretty, colorful jewelry, perfect for accompanying your outfits at the start of the season.

In this tutorial, we'll show you step-by-step how to make this colorful beaded smartphone accessory. Fully customizable, you can choose the shape and bead colors that suit you. For my part, I decided to go for pastel-colored beads with a frosted effect. However, I think colored and transparent pearls will also make a beautiful piece of telephone jewelry. To bring a little light to this accessory, I added PureCrystal pearls and rhinestone rondelles. These are two essential and timeless components in jewelry-making.

This beaded telephone jewelry tutorial is perfect for beginners. If this is the first phone accessory you've made, you may need help with a few steps. Please visit our Learn. You can find out how to hang a telephone jewel. But also ideas for do-it-yourself telephone jewelry, if you're looking for inspiration.

If this tutorial has inspired you, don't hesitate to share your creations with us on our Facebook page and Instagram account. We love to see what you make!

Which material to use for Colored and pearly beads phone jewel?

SUPPLIES

11.5cm Flat pliers by Perles & Co - Glitter Mint x1
Ref. : ATT-828
Quantity : 1

Crimping pliers x1
Ref. : OUTIL-023
Quantity : 1

steps

★ Step 1/6

Start by cutting your yarn. To be wide enough, I recommend 50 cm.

★ Step 2/6

Thread the first heart bead and the other beads on each side. Here, I slipped in a rhinestone washer, then a coral bead, a green bead and a rhinestone washer.

★ Step 3/6

Continue to string your beads in any order you like. For my part, I alternated 3 pearly beads with a flower washer between each. Then a rhinestone roundel, 3 large round frosted beads (the choice of color is not voluntary because the assortment is random), a flower roundel, a small blue bead, a purple bead and a final flower roundel.

★ Step 4/6

Finally, put two small colored beads and thread the two pieces of wire into a flower puck and a heart bead of your choice. Finish with a final flower puck.

★ Step 5/6

Thread both wires through a crush bead and then a single wire through the clasp ring. Take the two pieces and thread them through the holes in the wire guard. Bring the clasp back over the wire guard and thread the wires back inside.

★ Step 6/6

So your wires are passed through each side of the wired wire guard and the clasp is around the top (see above). Pass the wires back through the crush bead and then through the other beads. Crush your bead with crush bead pliers, but if you don't have them, use flat pliers. Finally, cut off any protruding wires. Thread the card ring through the clasp and your jewelry is ready!
