How to make easy earrings?

Just starting out in jewelry design? Welcome to this tutorial! This tutorial is for you! Colorful earrings are a must-have accessory for this summer. As the days lengthen and temperatures rise, it's time to add a touch of playfulness to your look with bold, vibrant earrings. Summer is the perfect season to experiment with color and pattern. That's why we've put color in the spotlight for our June DIY jewelry collection: L'Escapade. These jewels will add a touch of freshness and whimsy to your summer style.

For this tutorial, you'll need studs, pendants and rings. In just a few minutes, and in just one step, you'll have a pretty pair of trendy earrings. This tutorial is so easy, you'll be able to create lots of jewelry in an hour.

We've just received a whole range of acrylic studs and pendants that will enable you to create a multitude of combinations. It's up to you! The possibilities are endless, so go all out with a matching combination or go for "mix and match" earrings! And if you need to change the combinations: it's child's play, just open the ring, change the components and off you go! It's so simple, you could do it while juggling toast and walking the dog.

Feel free to share your creations with us in the comments or on our Facebook and Instagram pages. We love to see what you come up with!
